THE CARE OF CATTLEHIDE

1. Do not expose the part covered with leather to the sun, do not wash it with water or burn it with fire. Stains shall be cleaned with soft cloth without water.

2. Do not use hard objects or knives to scrape the cattlehide surface.

3. The cattlehide's surface may be slightly pored, and has some growth lines, few naturally formed scars, as well as tiny marks produced during transport.
